

**Andrea Bocelli Foundation, a thank you from Tuscany to all over the world.**

The two workshops organized by Andrea Bocelli Foundation have been made possible thanks to the contribution in various ways by the different realities of Tuscany. A thanks for the cooperation to the University of Pisa, the University of Florence, the High School of Sant'Anna of Pisa, CNR of Pisa, and the University of Palermo; all present with their professors and researchers to participate actively in the 6th July workshop.

A special thanks also to Acque Spa, always sensitive to the fight against poverty in developing countries, for helping to come to Pisa by Professor and Nobel Peace Prize 2006 Mohammed Yunus.

We also thank the AvMap, friends the Fondazione Unitalsi, CR Saute, Pacini Editore and Massimo Rebecchi for their commitment to the success of the day.

Thanks to Google, whereby it was possible to transmit the content of the workshop, to learn about our projects and give visibility to important scientific realities of the region Tuscany all over the world.

A really great thanks to the Opera Primaziale Pisana for allowing us to set our workshops in a setting as beautiful and unique as the Piazza dei Miracoli.
